Proposal for Math Curriculum: Grades 4-5 Math

Summary:

This proposal is for *Big Ideas Math* at Noble for our fourth and fifth graders. They currently have *My Math* by McGraw-Hill. However, this curriculum is being eliminated, and the workbooks will no longer be available for order after the 26-27 school year.

Rationale:

Big Ideas has proven to be a robust curriculum with challenging expectations. Hence, we are seeing greater student achievement in K-3. Because we value continuity between buildings, it is recommended that Noble adopt the same curriculum that Washington and Krout have used for two years, *Big Ideas Math*. This will align our elementary math curriculum from K-5 and bring them to the same place on our [TCS Curriculum Review Cycle](#).

Textbook of Choice:

The recommendation is to adopt *Big Ideas Math*. Currently there is one fourth grade teacher and one fifth grade teacher who have this curriculum, which was piloted at Noble last year.

Implementation & Costs:

To successfully launch this curriculum at Noble, the following resources are required:

- 4 Year License (to put them in same cycle as K-3)
- Materials, Resources, and Professional Development: Estimated Total Cost: **\$51,802.50** (4 yr)
-  4th and 5th Grade Math_V1.pdf

Conclusion:

By adopting *Big Ideas Math* curriculum, we will have a challenging and robust Math curriculum from K-5. We respectfully seek the Board's approval to implement *Big Ideas Math* at Noble in the upcoming academic year.
